

WE-ETH-IR-004

Starter Kit

Professional perimeters protection and outdoor intrusion detection system with 4 WiseEye video sensors.

Features:

- Robust Linux based system optimized for perimeters protection and intrusion detection applications
- Alerts video recording unit with remote access (ECU)
- Superior false positive rate under harsh weather conditions
- Remote view and playback of alerts video.
- Real time alerts viewing
- Audible notification and visual alert popup display
- Requires low bandwidth for remote access (e.g. cellular link)
- Real time alert notification with video clip to your mobile phone
- Day of week scheduler
- Optional interface with alarm system
- Up to 12 months of video alerts history storage
- WEB GUI, no need for client application
- Automatic detection of communication or power lose
- On screen display alert date, time and location
- Display split 1-4 sensirs

WiseEye Video Sensors

- 4 outdoor WiseEye-ETH wired video analytic sensors.
- Weather proof video sensors (IP66)
- 300 ft detection range
- Programmable various background filters
- Depth Of View filter to eliminate pets false alarms
- Full VGA (640x480) alert image
- True Day/Night operation with optional external IR illuminator
- Industry standard Ethernet 100/10 RJ45 port
- Low power (2 watt)
