

Emza Visual Sense Ltd.

Inventor of the World's first Visual Sensor – the all-in-one WiseEye® autonomous intelligent IP video sensor, for all-weather outdoor intrusion detection & visual verification with lowest false alarm rate in the market.

eNews August 11 2011

BOSCH

Emza and Bosch

Emza Visual Sense, the world's leader in visual sensors, has been selected to present in the Bosch Venture Forum in Stuttgart on September. Only 12 from over 100 candidates around the world have been selected to present at this prestigious commercial opportunity. Emza will present its Reduced Recognition Architecture (RRA) and the WiseEye product line – the most efficient solution for perimeter protection available today.

NICE

Nice Systems released support for Emza's WiseEye

Nice has released its support for Emza's WiseEye IP video devices under **NiceVision** video management platform version 10.8 and net 2.0. NICE customers can now benefit from Emza's leading IP video intelligent sensor for complete intrusion detection tasks under outdoor environment and tough weather conditions, providing highest detection rate with lowest false alarm known in the industry. By using the NICE VMS platform, an operator can use a single video control display to monitor and control a variety of video cameras, in parallel receiving real time video alerts pushed by Emza's intelligent edge device - directly to the operator's display.

Emza and the 2014 FIFA world cup

Emza's WiseEye was used to protect the 2014 FIFA world cup Preliminary Draw which took place at the Marina da Gloria in Rio de Janeiro on Saturday 30 July.

The product was installed at the site by Polsec one of major integrators in Brazil, to detect intruders in specific outdoor areas. It was connected to the security control room that was used to secure the hosting of FIFA VIPs and other guests from many countries. During the event, FIFA VIPs were impressed by the world's finest, most advanced security technologies, that will be used to protect the 2014 World Cup games in Brazil.

New 1.2 mile Emza installation

Afcon Control and Automation, the security integrator, has completed installation of Emza's WiseEye units at Agan Makhteshim, world leading supplier of agricultural chemicals (recently acquired by Chemchina). The WiseEye units were installed along 1.2 mile fence line, operating 24x7, day and night, saving manpower, reducing the security operation costs and most of all improving security at this sensitive site.

MICRO KEY SOLUTIONS

Emza integration with Micro key

Emza has released its new interface with **Microkey**, Central Station Automation software, which allows complete integration of video alarm signals within Micro key operator's user interface. The first implementation was successfully installed in Florida's **All American** monitoring center servicing Albuquerque based **Armed Response Team** for burglars alarms.

Emza Released XML based interface

Emza has released its new XML based interface connecting Emza's WiseEye intelligent IP video camera and any third party video management system or central monitoring software. The integration was successfully completed with **Bold Technologies** and **SureView Systems**, providers of video monitoring systems.

INSEASE

Integration Networking Security

Emza protects Chinese Supreme Court

Emza's partner in China, Insease, has completed installation of new system in the Chinese Gui Zhou province. This installation deploys Emza's WiseEye® intelligent video security sensors for protection of the new Supreme Court located at the province capital Gui Yang city.
